

BUDGET LETTER

SUBJECT: PAST, CURRENT, AND BUDGET YEAR SCHEDULE 10s (SUPPLEMENTAL SCHEDULES OF APPROPRIATIONS)	NUMBER: 07-27
REFERENCES:	DATE ISSUED: September 14, 2007
	SUPERSEDES: BL 06-25

TO: Departmental Budget Officers
Departmental Accounting Officers
Department of Finance Budget Staff

FROM: DEPARTMENT OF FINANCE

NOTE: After submission of the completed past year Schedule 10s, each departmental Budget Officer will receive a copy of the initial past, current, and budget year Schedule 10s with a hard copy of this Budget Letter (BL). If departments have Capital Outlay appropriations, they will receive two packages: (1) Capital Outlay three-year Schedule 10s and (2) State Operations and Local Assistance three-year Schedule 10s.

A. GENERAL

Based on the receipt of the completed past year Schedule 10s from departments, the Department of Finance (Finance) anticipates distributing three-year Schedule 10s beginning September 14 through October 1, 2007. Departments must update these Schedule 10s pursuant to the instructions contained in this BL. Updated Schedule 10s must be submitted to and processed by Finance prior to the first pass of spreadsheet galley in order to generate an Automated Detail of Appropriation and Adjustments Report, Summary of Program Requirements by Fund (SPR) Report, and the Fund Condition Statement turnaround document. Departments should plan to submit the first pass of their spreadsheet galley to Finance no later than November 5, 2007, unless otherwise notified by their Finance budget analyst.

Automated Detail of Appropriations and Adjustments Process: As part of the automated Detail of Appropriations and Adjustments process, departments update their Schedule 10s and submit them to their Finance budget analyst as often as time permits prior to submitting their budget spreadsheet package. Finance processes the Schedule 10s and generates an automated Detail of Appropriations and Adjustments and SPR Report with each departmental Schedule 10s submission. Departments must use the rounded expenditure numbers in their latest version of the Detail of Appropriations and Adjustments Report to build and tie the other fiscal statements contained within their budget spreadsheet prior to submitting the budget spreadsheet package to Finance. Please refer to Attachment I for the Detail of Appropriations and Adjustments rounding rules.

B. INSTRUCTIONS APPLICABLE TO ALL THREE YEARS

1. In the 2008-09 Governor's Budget spreadsheet, all amounts must be rounded to and displayed in thousands. However, the past and current year Schedule 10s are displayed in **whole dollars**. Budget year Schedule 10s will be rounded to the nearest thousand, but the three zeros **will not be dropped**.

After receipt of the completed past year Schedule 10s from departments, Finance will:

- a. review, update, and print past year Schedule 10s;
 - b. print initial current year Schedule 10s with authorized dollars (but without expenditures) including carryover and reappropriated amounts reported on the past year Schedule 10s; and
 - c. print initial budget year Schedule 10s without dollars.
2. The appropriation type ("ATYPE") and its description are located in the upper right-hand corner of the Schedule 10 records. Attachment II describes the differences between carryovers and reappropriations.
 3. For each appropriation, departments must verify that all expenditure authorizations are correct. This includes the following:
 - a. Verify the "Character" (state operations, local assistance, capital outlay, or unclassified), fund, appropriation identification (if a non-Budget Act item, the three-digit reference number following the organization code should match the State Controller's Office (SCO) records), and the description immediately following the appropriation identification number;
 - b. Verify the "Initial Authorization" dollar amounts by program, category, or project as authorized in the Budget Act or other authority;
 - c. Verify the "Adjustments" by budget revision, executive order, etc., correcting erroneous data and/or adding further adjustments to the appropriate Schedule 10 record, as necessary. Do **not** use a DF-38 Schedule 10 Missing Record Report to add adjustments to an existing Schedule 10 record (see Section 6 for proper use of DF-38);
 - d. Post the dollar corrections made by any adjustments to the "Revised Appropriation Totals" by program, category, or project. Verify the "Authorized," "Expenditures," "Savings," and "Carryovers" amounts by the schedule detail; and
 - e. Verify the "Year of Completion" (YOC), i.e., the last year of availability for encumbrance for each schedule in the appropriation. For example:
 - If an appropriation is available through any point in time in Fiscal Year 2006-07, the YOC = 06.
 - If an appropriation is available through any point in time in Fiscal Year 2007-08, the YOC = 07.

The YOC is shown in the "Revised Appropriation Totals" section and to the left of the schedule amount in the "Authorized" column. Please be aware that **the YOC can vary between programs, categories, or projects within an item.**

4. Capital Outlay projects are to be coded pursuant to the coding structure outlined in SAM 6839, except departments using CALSTARS must not use 00 as the two digit code to designate the program or element. The Schedule 10s should reflect the latest project codes that were created during preparation of the 2007-08 Governor's Budget. However, if the codes are incorrect, departments need to make appropriate changes on the Schedule 10s.

If you have any questions regarding Capital Outlay project codes, please contact your Finance Capital Outlay budget analyst.

5. **Capital Outlay projects that have been approved to proceed to bid:**

- If a Capital Outlay project is approved to proceed to bid, but a contract has not yet been awarded, show construction dollars as a **carryover**.
- If the contract has been awarded, show dollars as **expended**.
- If funding is transferred to the Architecture Revolving Fund, show dollars as expended.
- If funding was shown as expended on Schedule 10s for years prior to 2006-07, no change is necessary.

6. The Schedule 10 Missing Records Report, DF-38, Rev 6/00 (copy attached), will be used only in the event an appropriation is not reflected on a Schedule 10. In addition to the information requested on the top of the DF-38, departments must reflect the (1) Initial Authorization; (2) Adjustments; and (3) Revised Appropriation Totals including Expenditures, Savings, and Carryovers. Also, the YOC and title of programs, categories, or projects must be shown. (See Sample DF-38 attached.)

Place the DF-38s in the proper sequence; i.e., arrange all Schedule 10s and DF-38s in the same order as the appropriations appear in the Detail of Appropriations and Adjustments in the Governor's Budget. Place the correct page number on the attached DF-38, i.e., the page number of the preceding Schedule 10 followed by an "a," "b," etc., as appropriate. Also, on the Schedule 10s, do **not** duplicate any appropriations reported on DF-38s.

A DF-38 must also be prepared for every new chapter of legislation making a specific appropriation. Record the data on the DF-38 in one of two ways:

- a. In the bill, if the appropriation **augments an existing appropriation** (e.g., the bill reads "in augmentation of Item XXXX-XXX-XXXX, Budget Act of 20XX"), complete the DF-38 to create the appropriation record as follows:
 - (1) Following the "Initial Authorization," include an "Adjustment" on the DF-38 for the Chapter record which will read "Allocation to Item XXXX-XXX-XXXX, Budget Act of 20XX" with a minus dollar amount in the "Authorized" column.
 - (2) Record the corresponding "plus adjustment" on the Schedule 10 for the Budget Act appropriation that is being augmented, e.g., "Allocation from Chapter X, Statutes of 20XX" with a plus dollar amount to the appropriate programs, categories, or projects in the "Authorized" column. (If the appropriation to be augmented is scheduled, a related Budget Revision (BR) must be processed to provide the SCO with the detail of the schedules to be augmented.)

- b. If the bill **does not include language augmenting an existing appropriation**, complete the DF-38 to create the appropriation record for the chapter. No "Adjustment" will be required as expenditures will be recorded against the bill's appropriation.
7. With the implementation of the automated Detail of Appropriations and Adjustments process, it is not necessary for departments to manually update the Schedule 10 character and department summary totals. The Schedule 10 computer file will calculate these totals, which will be reflected on the updated Schedule 10s and the automated Detail of Appropriations and Adjustments Report.

C. INSTRUCTIONS APPLICABLE TO PAST YEAR

Actual expenditures reported by departments on the past year Schedule 10s are considered final and these expenditures must reflect the same dollar amounts reported to the SCO in the year-end financial statements. No changes are to be recorded on these Schedule 10s except in the case of a material adjustment upon which agreement has been reached with the SCO and Finance (Program Budget Manager and Financial Operations) that such an adjustment will be made. In this case, the adjustment and all subsequent changed totals must be clearly noted on the Schedule 10.

D. INSTRUCTIONS APPLICABLE TO CURRENT YEAR

- 1. Actual past year carryovers or reappropriations must be reflected on Schedule 10s. If no record exists for posting carryover dollars, create the carryover record by preparing a DF-38. Please note: The current year initial authorized dollars must match the past year carryover amount by schedule.
- 2. The department must record the estimated full year expenditures, savings, and carryovers in the "Revised Appropriation Totals" section.

E. INSTRUCTIONS APPLICABLE TO BUDGET YEAR

- 1. Budget year Schedule 10s are generated on the basis of current year expenditure authorizations, but without dollar amounts. These Schedule 10s include potential carryovers from the current year.
- 2. If a new appropriation or reappropriation record is to be created in the budget year, prepare a DF-38. **Do not** record the new appropriation on an existing Schedule 10 record by changing the item number, description, etc.
- 3. If an existing record on the Schedule 10 will not be used in the budget year, cross out the record. **Do not** tear out the page and throw it away. Financial Operations must delete these unnecessary records from the computer files.
- 4. For potential Capital Outlay budget year Budget Act appropriations, initial budget year Schedule 10s will not reflect the project detail from the corresponding current year Schedule 10s. The new budget year project detail must be added by departments. However, if the current year Schedule 10s reflect expenditure authority for projects available beyond the current year (YOC greater than current year), the budget year "Carryover" (ATYPE 3-0) Schedule 10 record will include these projects, but without dollar amounts. Departments must enter proposed amounts by program, category, or project in the "Authorized" column and the total proposed expenditure amounts in the

"Expenditures" column **in the Revised Appropriation Totals section only**. IT IS NOT NECESSARY TO REPEAT THE DATA IN THE INITIAL AUTHORIZATION SECTION.

5. All budget year amounts must be rounded to the nearest thousand with "000s" included. Current year to budget year carryover amounts will be rounded in this manner.

If you have any questions or need technical assistance, please call your Finance budget analyst.

Automated Detail of Appropriation and Adjustments Report Rounding Rules

When this Detail of Appropriations and Adjustments Report process was introduced back in 2001, a problem was identified which involved the **rounded** Detail of Appropriations and Adjustments Report expenditures versus the **rounded** expenditures reported in the other fiscal statements within the budget spreadsheet. Since the Detail of Appropriations and Adjustments Report rounded expenditure dollars **must** be used to tie to the dollars reported in the other fiscal statements in the department's budget spreadsheet, Finance is providing the rounding rules used for the Detail of Appropriations and Adjustments Report. These rules should assist departments in identifying where rounding problems may occur within the other fiscal statements in their spreadsheets.

The Detail of Appropriations and Adjustments Report program uses the standard rounding rules—five or more, round up; less than five, round down.

Like adjustments using the same authority within an item: Schedule 10 whole dollars are summed and the total is rounded and displayed on the appropriate adjustment line printed in the Detail of Appropriations and Adjustments Report.

For example, a department might process multiple budget revisions or executive orders notifying the State Controller's Office to increase or decrease expenditure authority in an item pursuant to specific Budget Act provisional language. Each budget revision processed by the department is a separate adjustment in the Schedule 10s. However, the adjustments are displayed under one authority in the Detail of Appropriations and Adjustments. Therefore, pursuant to the Detail of Appropriations and Adjustments rounding rules, every Schedule 10 adjustment using the same provisional authority within that item is summed together, and the total of these adjustments rounded to thousands and displayed in the Detail of Appropriations and Adjustments under that authority.

Unique or individual adjustments with different authority: Separate authority outside the Budget Act, such as chaptered legislation, may increase or decrease a department's expenditure authority. This authority is displayed as one adjustment line in the Detail of Appropriations and Adjustments. In this situation, the Detail of Appropriations and Adjustments Report rounds the Schedule 10 whole dollars to thousands for this specific authority and displays those dollars for that authority in the Detail of Appropriations and Adjustments Report.

Total Expenditures: The Detail of Appropriations and Adjustments Report program sums all the rounded dollars displayed (by year, by fund, and by character) to calculate the "Total Expenditures".

Total Expenditures, All Funds (by character): The Detail of Appropriations and Adjustments Report program calculates this dollar amount by summing the rounded Detail of Appropriations and Adjustments Report Total Expenditures line for each fund for that character.

Total Expenditures, All Funds (State Operations and Local Assistance): This dollar amount is calculated by summing the State Operations and Local Assistance Total Expenditure lines.

Capital Outlay: The same Detail of Appropriations and Adjustments rounding rules apply for Capital Outlay.

Carryovers and Reappropriations

Carryover (ATYPE = 3)

This Schedule 10 record is for funds available for expenditure in the years following the initial year of appropriation (YOA), i.e., the year the appropriation is first authorized for expenditure.

Example:

Appropriation in legislation available for three years beginning in 2006-07:

<u>Year</u>	<u>Appropriation Name</u>	<u>ATYPE and Description</u>
1st Year: 2006-07	Chapter X, Statutes of 2006	2 = Financial Legislation
2nd Year: 2007-08	Chapter X, Statutes of 2006	3 = Carryover
3rd Year: 2008-09	Chapter X, Statutes of 2006	3 = Carryover

Reappropriation (ATYPE = 4)

This Schedule 10 record is for expenditure of funds authorized by a "reappropriation item" in the Budget Act, or as authorized in other legislation, following the initial appropriation (authorization) year.

Example:

<u>Year</u>	<u>Appropriation Name</u>	<u>ATYPE and Description</u>
1st Year: 2006-07	XXX Budget Act appropriation	1 = Budget Act Item
2nd Year: 2007-08	Item XXXX-XXX-XXXX/2006, as reappropriated by Item XXXX-490, Budget Act of 2007	4 = Reappropriation
